monastery of alcobaça (p) during belgian week 2013  
works purchased by belgian embassy in lisbon (p)

exhibition woodboys (no time to waste)  
creation for leeuwarden (nl) cultural capital europe 2018

...

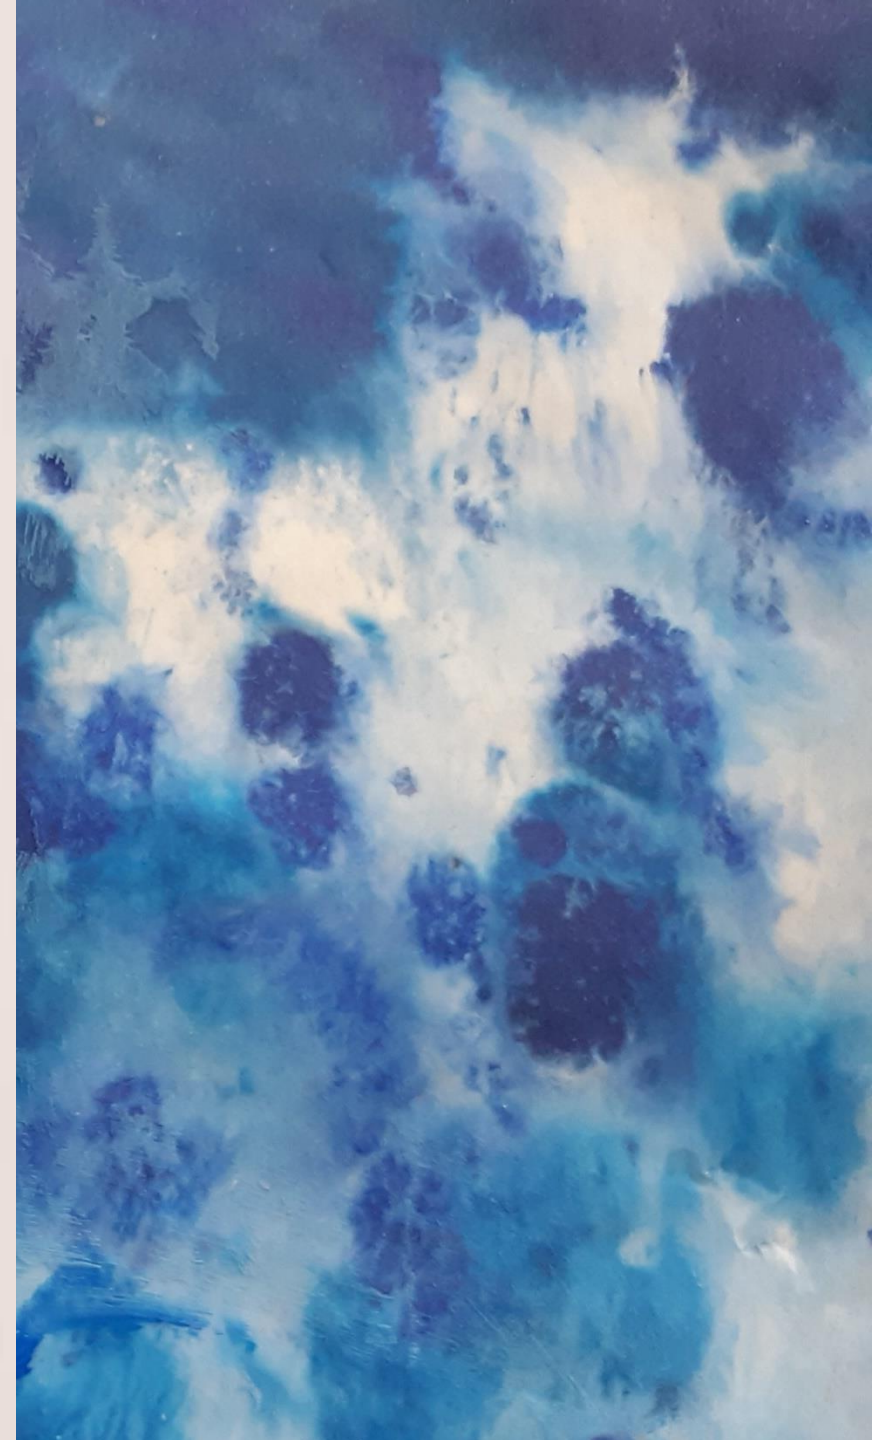

# INTRODUCTION

*Water is nature's mother. Water pollution can be harmful to people and animals, it can even be fatal. Education can never start too early.*

*The water game can be an incentive for a permanent education of young children and it can be an additional value for musea, cultural centres, art initiatives etc.*

koen bovéé (b)  
scenographer

*...this is a constant  
opportunity  
to teach little visitors  
how precious water is...*

# importance of the project

topic

water is a main issue for children

current climate change and  
ecological challenges for the future

target audience

young children  
6 – 14 year old

# concept

education

game presented in 8 themes  
6 - 14 years

artistic

postcard... the activist artist in you  
6 - 14 years

a mobile of water drops  
6 - 8 years

story workbook  
9 - 14 years

# educational game | example

# educational game | material

maximum 8 storyboards each  
representing one theme

each storyboard has 12 boxes  
representing different problems and  
advantages of water and climate

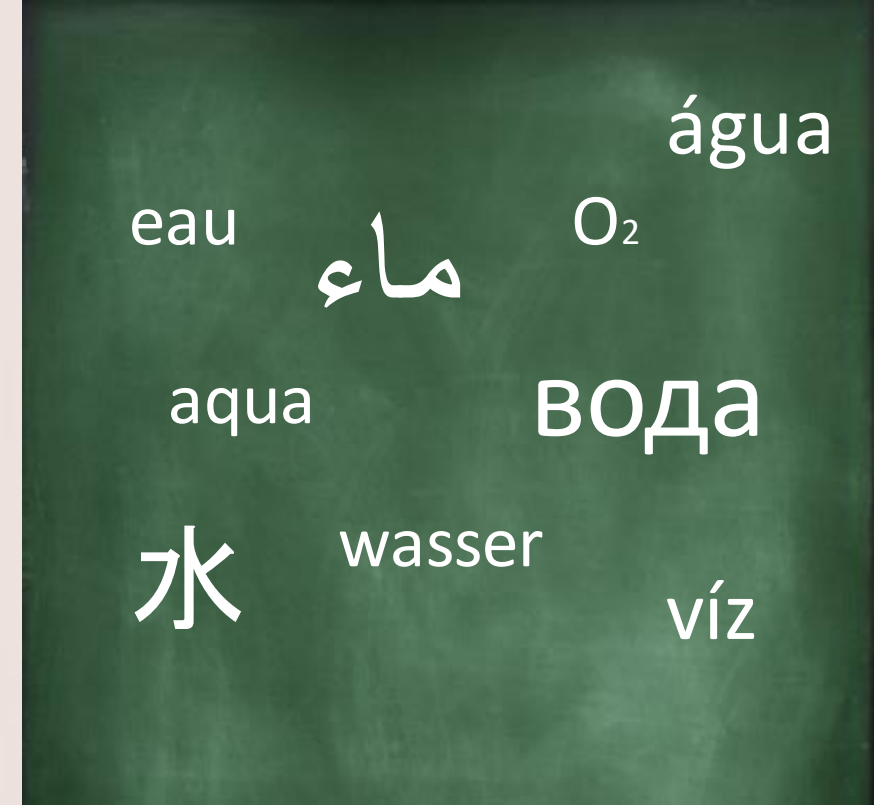

2 extra boxes with magnetical letters

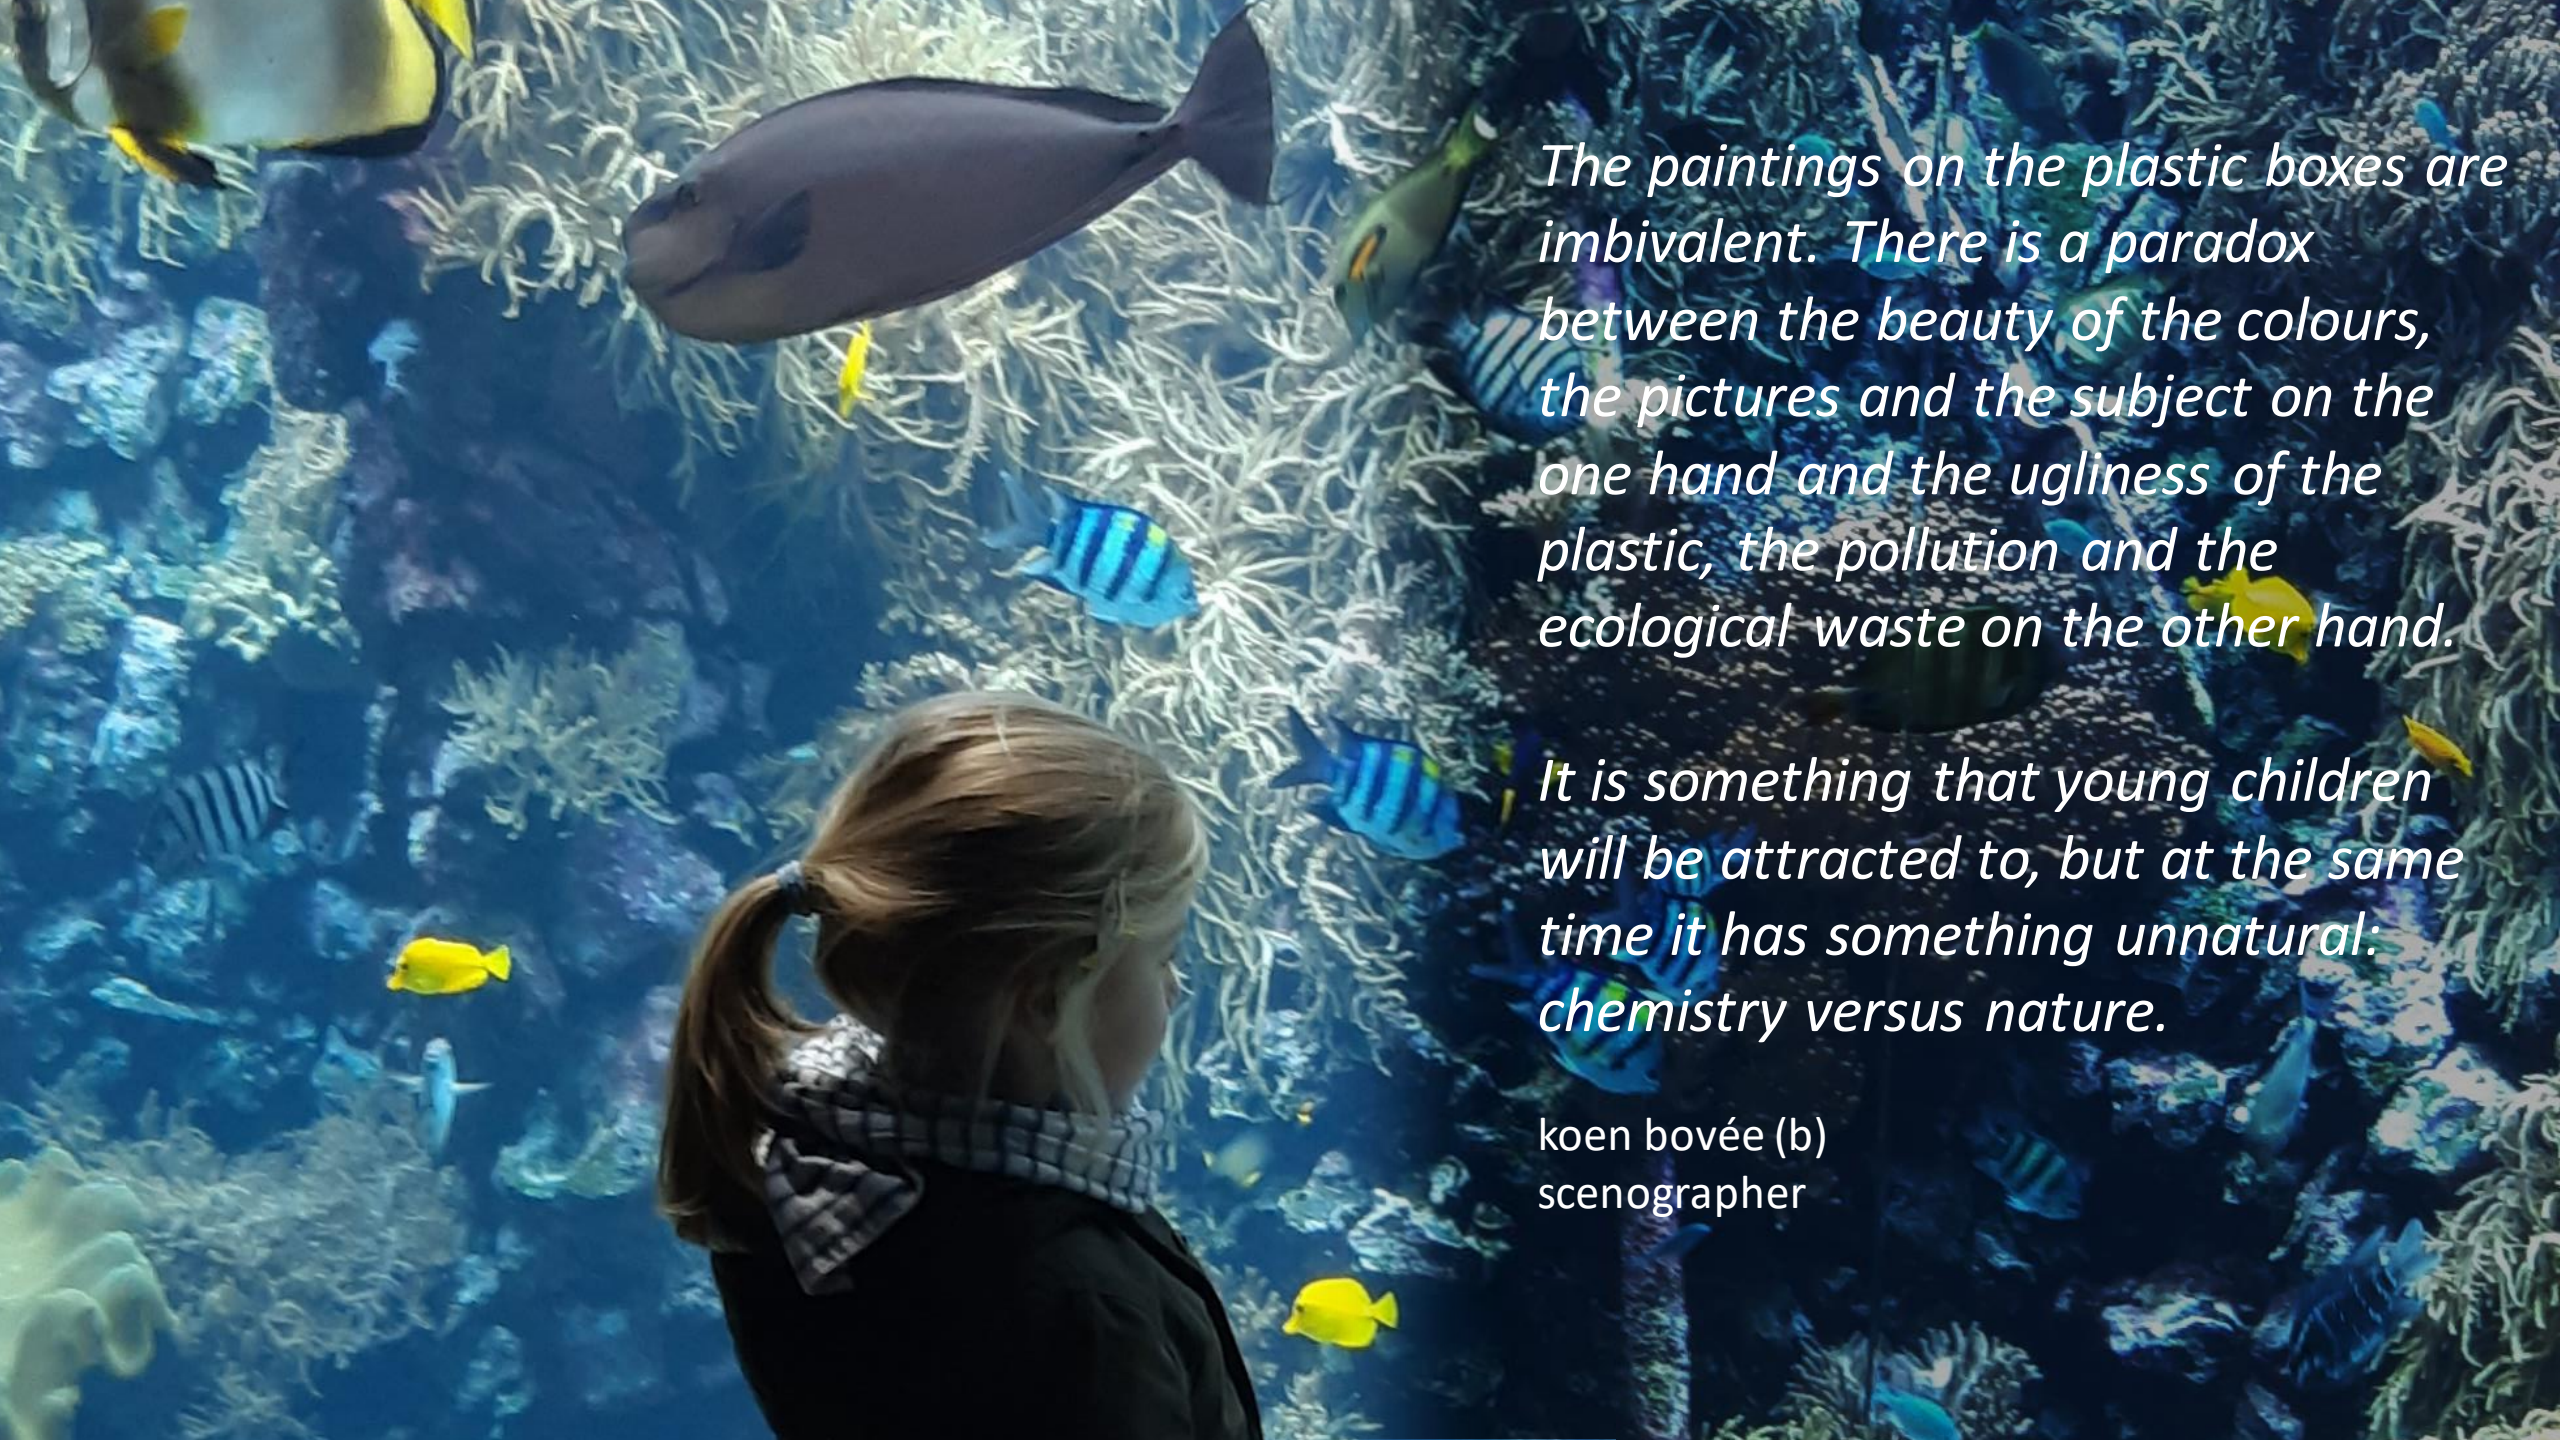

# educational game | methode

- 1 | children learn and look at the boxes  
(= different problems and advantages of water)
- 2 | each child gets one magnetical word  
and tries to connect it with one box
- 3 | the mentor can choose activities  
in a manual to explore and discuss  
different water and climate issues
- 4 | choise between 3 workshops

*The paintings on the plastic boxes are ambivalent. There is a paradox between the beauty of the colours, the pictures and the subject on the one hand and the ugliness of the plastic, the pollution and the ecological waste on the other hand.*

*It is something that young children will be attracted to, but at the same time it has something unnatural: chemistry versus nature.*

koen bové (b)  
scenographer

# mobile of water drops

| 6-8 years

children make a mobile  
under the supervision  
of mentors

# story book

| 9-14 years

find pictures in magazines/newspapers

(e.g. water animals, waterfalls, rivers, sea and desert, surfers, pool images, swimmers..., anything that has to do with water...)

make a creative design on each page

(collage, painting, poem,...)

if you need inspiration, you can have a look in an example story book of griet baeyens

I DON'T BELIEVE IN  
GLOBAL WARMING

# be the activist artist in you

| 6-14 years

children make their own postcards

the storyboards can be a source of inspiration

*... let your imagination  
run wild in drawings, collages,  
color surfaces,  
assemblies ...*

want more?

diploma water expert

quiz

magnets

workshops

...

how is water purified?  
is there pure water everywhere in the world?  
what is the percentage of water in the human body?  
what are healthier than water?  
how long can a person survive without water?  
how is water stored in the body?

*... the exhibition moving water on tour inspires,  
encourages imagination, reflection...*

# MOVING WATER

on tour

want to jump in the water project?
